

You can download both the transcript, and video itself, within My Media in Blackboard. On the main Bb page, click on My Media in the bottom left corner of the screen. Once there, scroll to the video you'd like to download, and click the pencil icon to the far right of the video (next to the trashcan icon).

That will bring up the edit screen.
Here you can:

1. Download the video using the download button on the top right part of the video
2. Download the transcript using the download button in the transcript bar below the video
